A Message for You

Dallas, Texas, is an important member of the Intelligent Office franchise network. Opened in 2008 by Ralph Gregory, the founder of the Intelligent Office franchise concept, the location has been building the client base with a diversified representation of the industries in the Metroplex. Dallas clientele take advantage of the office's prime location, featuring views of Las Colinas and a close proximity to both DFW and Love Field Airports. It is also just down from the Four Season Hotel. The clients who value us most are those who want to capture new business and take care of new clients. Actively involved in the local business community (especially with networking, see the one-stop calendar!), Dallas's Intelligent Office has become the premier choice for those needing professional office and communications solutions. Offering highly trainable Intelligent Assistants® able to handle clients' calls by acting as integral parts of their staff, each individual customer is handled exactly the way the client wants it done. Intelligent Office/Dallas benefits from (and appreciates) the ongoing stream of referrals from existing clients. The Dallas Intelligent Office is located on the second floor of the Commercial Metals Building with easy access to the 114, 161 and 635 Freeways systems. The staff prides itself on coming up with business solutions "outside the box" as well as having new professional offices, and a large selection of a la carte services, customized for each of our clients.
